Oleksandr Dreshpak

Project Manager

Dnipro, Ukraine · dreshpak.alex@gmail.com · linkedin.com/in/dreshpack · Portfolio: dreshpack.github.io/nutriscan · English: B2

SUMMARY

Project Manager with 2 years of experience running client projects (1–6 months each) for mobile apps on Google Play, leading a cross-functional team of 7: developers, designers, ASO and QA. Former Unity developer (2 years), comfortable discussing scope and trade-offs with engineers. Works in Scrum and Kanban; uses Claude, ChatGPT and Gemini in daily PM work. Completed the DAO PM UA 027 course (PMBOK 8, Scrum).

EXPERIENCE

Project Manager — Affiliate marketing company (name under NDA), 100+ employees — Nov 2024 – Present

Mobile apps for Google Play · team of 7: 3 developers, 2 designers, 1 ASO specialist, 1 QA · Scrum / Kanban · Jira, GitHub, Confluence, Miro

- Led the response to a payment outage in India across a batch of live apps: re-prioritised the team, brought developers into testing alongside QA and shipped the fix within 4 days of the client's report; strengthened automated tests to catch similar issues before release.
- Removed design as the team's bottleneck after the dev team grew while design stayed at 2 people: scheduled design one batch ahead of development to cut designer idle time and had developers build on placeholders, so they no longer waited on mockups.
- Ran delivery for several clients in parallel under contracts of 1–6 months, each covering a large batch of apps; aligned scope, priorities and deadlines with clients together with the Delivery Manager.
- Coordinated each release across development, design, ASO and QA in Scrum or Kanban, so every app reached Google Play with store assets and QA sign-off.
- Handled Google Play policy enforcement (app suspensions) by quickly bringing in the right specialists to restore the release flow.
- Used Claude, ChatGPT and Gemini to draft specs and test cases, prepare client reports and automate routine Jira tasks.

Unity Developer — Wild Wild Leads — Jul 2023 – Oct 2024

- Developed apps for affiliate marketing (iGaming) in Unity (C#).
- Worked directly with designers to implement their mockups and wrote technical specs for features.

Unity Developer — Nasty Cat — Oct 2022 – Jun 2023

- Developed desktop (PC) games in Unity (C#), working closely with designers on UI and game assets.

TRAINING PROJECT

NutriScan MVP — DAO PM UA 027 course, team project — Aug – Oct 2026

OCR food-label scanning app (iOS + Android) · full project lifecycle, from client brief to closure

- Initiation: clarified the client's request, set a SMART goal and success criteria, defined scope and out-of-scope, mapped stakeholders.
- Requirements: collected them from user interviews and stakeholder input, kept a traceability matrix, wrote user stories with Given/When/Then acceptance criteria.
- Planning: WBS, estimates, Gantt with critical path, milestones, risk buffers, budget and roadmap.
- Execution and control: set up Jira (Scrum board, WIP limits, dependencies, JQL filters, dashboard), tracked plan vs actual and EVM, assessed a change request and handled a mid-project crisis.
- Closure: closure report, lessons learned and handover.

SKILLS

Methodologies: Scrum, Kanban, hybrid delivery

Planning & control: WBS, Gantt, critical path, risk register, change requests, EVM, status reporting

Requirements & stakeholders: user stories, acceptance criteria, stakeholder management

Tools: Jira (workflows, JQL, dashboards, REST API), Confluence, Notion, GitHub, GanttPRO, Miro, Figma, Google Play Console, Google Workspace, Slack, Microsoft Teams

AI: Claude, Claude Code, ChatGPT, Gemini · local models (Ollama, Whisper)

Technical: Unity (C#), Python, JavaScript, HTML / CSS, REST APIs, Git

EDUCATION

Applied Mathematics — Oles Honchar Dnipro National University — 2019 – 2024

DAO PM UA 027 — Project Management course — 2026
